

Don't spoil natural setting at park

Posted: Saturday, August 2, 2003 12:00 am

Editor,

Part of Jean Klock Park may be sold for income for the city of Benton Harbor. In my opinion I feel that it should not be sold for city income.

If the city of Benton Harbor allows building the houses on parkland, that would make us shorter on natural resources. There is a better way to use the land. They could add to Jean Klock Park, or at least build a recreational facility for the kids. I feel that we should be building to help kids instead of building more houses wasting our natural resources. If the city of Benton Harbor would use the parkland for a better use, that would help our city a lot. As long as the builders build the houses on the land, our natural resources will just continue to get lower.
